Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

St. John's	(1-800-565-7192)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Newfoundland, Labrador, Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-263-1136
Manitoba, Saskatchewan, Alberta and Northwest Territories	1-800-563-7828
British Columbia and Yukon	1-800-663-1551
Telecommunications Device for the Hearing Impaired	**1-800-363-7629**
Toll Free Order Only Line (Canada and United States)	**1-800-267-6677**

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Marketing Division, Sales and Service, Statistics Canada, Ottawa, K1A 0T6.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(1-800-565-7192)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, **aux utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

This publication was prepared under the direction of:

- **Louis Marc Ducharme,** Assistant Director, Prices Division
- **Robin Lowe,** Chief, Goods & Services Producing Industries Section

Michel Jacod has returned to INSEE (in France) following a posting for two years as Director of Prices Division. During his brief stay with us, Michel was able to pass on his dynamism and we sincerely thank him for his legacy. We offer him our best wishes for success in his new responsibilities.

Cette publication a été rédigée sous la direction de:

- **Louis Marc Ducharme,** Directeur adjoint, Division des prix
- **Robin Lowe,** Chef, Section des Industries de biens et de services

Michel Jacod est retourné à l'INSEE (France) après une affectation de deux ans comme Directeur de la Division des prix. Au cours de son bref séjour parmi nous, Michel a su nous transmettre son dynamisme et nous le remercions sincèrement pour son apport. Nous profitons de l'occasion pour lui offrir nos meilleurs voeux de succès dans ses nouvelles fonctions.

Highlights

Industrial Product Price Index

According to preliminary figures, the Industrial Product Price Index (IPPI, 1986 = 100) in July 1993 rose to 112.2, up 0.2% from May and June's value of 112.0. However, the IPPI remains below March's value of 112.3.

Indexes for twelve of the 21 major groups of products increased while four declined and five did not change. The most significant month-to-month price increases were in primary metal products (1.6%) and tobacco and tobacco products (4.6%). Amongst the price declines, the most important were in lumber, sawmill, and other wood products (-1.0%) and meat, fish and dairy products (-0.6%).

In July, the year-to-year change in the IPPI remained at 2.8%, appreciably below January's year-to-year change of 4.4%. The year-to-year change in both first stage and second stage intermediate goods continued to decline, the former having been falling since January and the latter since March. The month-to-month figures, however, showed the first stage intermediate goods price index up as a result of the increase in primary metal product prices. Amongst finished goods, the year-to-year change in foods and feeds has also been declining since May. In July there was also a decline in the month-to-month change in foods and feeds, the result of the fall in meat prices. However, both capital equipment and all other finished goods have seen their year-to-year change increasing from May.

The primary metal products price index rose 1.6% in July as aluminum prices rose in response to cutbacks in output by North American producers and the prices of precious metals were bid up. Amongst the non-ferrous metals, however, nickel prices were down somewhat as the market remained weak and exports from the Commonwealth of Independent States remained strong. The July increase in primary metal product prices followed five monthly declines. In July, the year-to-year price change was -1.9% compared to -3.2% in June.

The lumber, sawmill and other wood products price index declined for the fourth consecutive month in July, falling 1.0% to 127.7. Since March it has fallen by 16.2% from 152.4. The index, however, remains 12.8% higher than in July 1992. The July decline was primarily due to the continuing fall in softwood lumber prices. These declined throughout the country, except in Quebec where the softwood lumber index rose 1.4%. The largest decline was on the coast of British Columbia where there was a 4.0% decline in softwood prices.

Tobacco and tobacco products recorded a 4.6% increase in the month of July as prices rose throughout the industry. There was also a sharp increase in the year-to-year change in the index which increased from 4.5% in June to 9.4% in July.

The meat, fish, and dairy products index declined -0.6% in July after having remained level in June. This was the first decline in the index since July 1992. The decline occurred as cattle producers met the demand for summer cuts of meat and as the supply of the available fish species increased. Fresh pork prices, however, were up somewhat as demand remained constant and quantities remained low. The year-to-year change in the index was also down, falling to 3.8% in July from 4.3% in June.

Faits saillants

Indice des prix des produits industriels

Selon les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) progresse en juillet 1993 pour se fixer à 112,2, soit 0,2% de plus qu'en mai et juin alors qu'il s'établissait à 112,0. L'IPPI est cependant inférieur au niveau de 112,3 atteint en mars.

Les indices de douze des 21 grands groupes de produits augmentent, tandis que quatre diminuent et cinq n'enregistrent aucune variation. Les variations mensuelles de prix les plus importantes sont celles des produits métalliques primaires (1,6%) et du tabac et des produits du tabac (4,6%). Au chapitre des diminutions, les plus importantes sont celles des sciages, des produits de scierie et des produits divers (-1,0%) et de la viande, du poisson et des produits laitiers (-0,6%).

En juillet, la variation annuelle de l'IPPI reste au même niveau de 2,8% et elle est sensiblement inférieure à celle de 4,4% observée en janvier. La variation annuelle des produits semi-finis de première étape et de deuxième étape continue à décroître, les premiers étant dans une période de repli depuis janvier et les deuxièmes, depuis mars. Toutefois, selon les chiffres mensuels, l'indice des produits semi-finis de première étape progresse en raison de la hausse du prix des produits métalliques primaires. Dans le cas des produits finis, la variation annuelle des aliments de consommation et des aliments pour animaux est également en baisse depuis mai. En juillet, on note aussi un repli de la variation mensuelle des aliments pour consommation et des aliments pour animaux, qui s'explique par le recul du prix de la viande. Cependant, à partir de mai, on constate une hausse de la variation annuelle, à la fois pour le matériel capitalisé et tous les autres produits finis.

L'indice des prix des produits métalliques primaires augmente de 1,6% en juillet, suite à la hausse du prix de l'aluminium provoqué par la réduction de la production nord-américaine de ce métal et à la surenchère qui a poussé les cours des métaux précieux à la hausse. Toutefois, parmi les métaux non ferreux, les prix du nickel diminuent quelque peu étant donné que le marché demeure faible et que les exportations de la Communauté des états indépendants continuent d'être vigoureuses. La hausse du prix des produits métalliques primaires enregistrée en juillet fait suite à cinq baisses mensuelles. En juillet, la variation annuelle des prix s'établit à -1,9%, comparativement à -3,2% en juin.

On observe en juillet une quatrième baisse consécutive (-1,0%) de l'indice des prix des sciages, des produits de scierie et des produits divers, qui atteint le niveau de 127,7. Depuis mars, cet indice, qui s'établissait alors à 152,4, a diminué de 16,2%. Il demeure toutefois à un niveau qui dépasse de 12,8% celui de juillet 1992. Le recul de juillet est en majeure partie attribuable à la baisse soutenue des prix du bois de construction de résineux. Ces derniers ont reculé dans toutes les régions du pays, sauf au Québec où l'indice des prix du bois de construction de résineux a augmenté de 1,4%. La plus forte baisse a été enregistrée sur le littoral de la Colombie-Britannique où on a observé un repli de 4,0% du prix du bois de construction de résineux.

En juillet, les prix du tabac et des produits du tabac augmentent de 4,6%, en raison d'une hausse des prix dans l'ensemble de la branche d'activité. On constate en outre une forte progression de la variation annuelle de l'indice, qui est passée de 4,5% en juin à 9,4% en juillet.

L'indice de la viande, du poulet et des produits laitiers se replie de -0,6% en juillet, après être demeuré stable en juin. Il s'agit de la première baisse de l'indice depuis juillet 1992. Ce recul coïncide avec le moment où les éleveurs de bétail ont répondu à la demande de coupes estivales et à celui où les stocks de poissons offerts ont augmenté. Toutefois, le prix du porc frais progresse quelque peu car la demande demeure constante et les quantités se maintiennent à un niveau peu élevé. On enregistre en outre une diminution de la variation annuelle de l'indice, qui est passée de 4,3% en juin à 3,8% en juillet.

Highlights

Raw Materials Price Index

Based on preliminary data, the Raw Materials Price Index (RMPI, 1986 = 100) was 112.7 in July 1993, down 1.9% from the previous month. The decrease in the overall index is attributable to declines of 6.9% in the mineral fuels index and 2.2% in the animals and animal products index. However, five of the seven major components posted increases in July. The RMPI was up 4.3% from the July 1992 figure, mainly as a result of higher indexes for wood (39.9%) and animals and animal products (4.4%). These increases were offset by the 12.1% decline in the mineral fuels index. The overall index excluding mineral fuels has risen 11.9% over the previous twelve months.

The mineral fuels index fell 6.9% in July 1993, reflecting the 7.5% decrease in its principal component, crude mineral oils. The mineral fuels index was pegged 12.1% lower than its July 1992 level owing to a 13.4% drop in the crude mineral oil index.

The animals and animal products index was down 2.2% in July 1993 because of lower prices for cattle (-5.7%) and hogs (-2.6%). This decrease follows five months of steady increase in these indexes. From July 1992 to July 1993, the animals and animal products index rose 4.4%. The primary contributing factors were increases in prices for cattle and calves (8.5%) and hogs for slaughter (13.0%).

After four months of decline, the non-ferrous metals index registered its second rise in a row, 3.0% in July 1993. This was largely due to increases in the price of gold (8.5%) and the prices of aluminum materials (4.7%). Over the last twelve months the non-ferrous metals index has dropped 5.2%, mainly owing to lower indexes for concentrates of copper (-19.6%), zinc (-23.2%) and nickel (-29.9%). These decreases were offset by higher prices for gold (20.7%) and radioactive concentrates (29.8%).

The vegetable products index posted a 1.3% increase in July 1993, reflecting higher prices for grains (3.3%), oilseeds (3.7%) and cocoa, coffee and tea (8.3%). A compensating factor was the 9.1% decrease in the unrefined sugar index. The vegetable products index rose 6.5% over the July 1992 figure, pushed up by rising indexes for oilseeds (21.8%), raw tobacco (9.7%) and wheat (7.1%).

Finally, the wood index continued to rise in July, albeit fractionally, by 0.3% to 195.4, its highest level since 1981. The rate of increase has slowed in the last four months; nevertheless, its increase of 39.9% from a year ago has had the largest impact on the overall change in the RMPI.

Faits saillants

Indice des prix des matières brutes

D'après les chiffres préliminaires, l'indice des prix des matières brutes (IPMB, 1986 = 100) a atteint 112,7 en juillet 1993, soit une diminution de 1,9% par rapport au mois précédent. La chute de 6,9% de l'indice des combustibles minéraux et celle de 2,2% de l'indice des animaux et substances animales sont responsables pour la baisse globale. Enfin, cinq des sept indices majeurs ont enregistré des hausses en juillet. Par rapport au mois de juillet 1992, l'IPMB a progressé de 4,3% principalement en raison des augmentations des indices du bois (39,9%) et des animaux et substances animales (4,4%). L'effet à la hausse a été atténué par la baisse de 12,1% de l'indice des combustibles minéraux. L'indice total, sauf les combustibles minéraux, a progressé de 11,9% au cours des douze derniers mois.

L'indice des combustibles minéraux a diminué de 6,9% en juillet 1993, suite à une diminution de 7,5% de sa principale composante, l'indice des huiles minérales brutes. L'indice des combustibles minéraux a chuté de 12,1% depuis juillet 1992 en raison de la diminution de 13,4% de l'indice des huiles minérales brutes.

L'indice des animaux et substances animales a connu une diminution de 2,2% en juillet 1993 qui est attribuable à la chute de 5,7% de l'indice des bovins et à celle de 2,6% des prix du porc. Cette baisse survient après cinq mois de hausse continue. De juillet 1992 à juillet 1993, l'indice des animaux et substances animales a progressé de 4,4%, principalement en raison des augmentations de 8,5% des indices des bovins et veaux et de 13,0% de celui du porc destiné à l'abattage.

Après quatre mois de baisse, l'indice des métaux non ferreux a enregistré en juillet une seconde hausse de suite (3,0%), surtout en raison de l'augmentation de 8,5% du prix de l'or et de 4,7% de l'indice des matériaux d'aluminium. Au cours des douze derniers mois, l'indice des métaux non ferreux a diminué de 5,2%, principalement à cause de la baisse des indices des concentrés de cuivre (-19,6%), de zinc (-23,2%) et de nickel (-29,9%). Cependant, ces baisses ont été atténuées par les hausses de 20,7% du prix de l'or et de 29,8% de celui des concentrés radio-actifs.

L'indice des substances végétales était en hausse de 1,3% en juillet, surtout à cause de la hausse de 3,3% des prix des céréales, de 3,7% de ceux des oléagineux et de 8,3% du cacao, café et thé. Cependant la hausse a été modérée par la chute de 9,1% du sucre non raffiné. Par rapport à juillet 1992, l'indice des substances végétales a augmenté de 6,5%, en raison de la hausse des indices des oléagineux (21,8%), du tabac en feuilles (9,7%) et du blé (7,1%).

Enfin, l'indice du prix du bois a continué d'augmenter en juillet de 0,3% à 195,4, son plus haut niveau depuis 1981, mais le rythme d'augmentation est plus faible que dans les quatre mois précédents. De plus, l'augmentation de 39,9% par rapport à juillet 1992 a été le changement qui a eu le plus grand impact sur la hausse de l'IPMB par rapport à l'an dernier.

(1) These indexes are preliminary
(1) Ces indices sont provisoires.
(2) Revised.
(2) Révisé.
(3) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(3) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

TABLE 3. Industrial Product Price Indexes, by Industry and Industry Groups(1)

TABLEAU 3. Indices des prix des produits industriels, par industries et groupes d'industries(1)

1986 = 100

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^i$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: users' guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in 1986;
$P_{t/o}^i$	is the price index for element i, meaning its price change from the base period o to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;
w^i	est la valeur de transaction de l'élément i en 1986;
$P_{t/o}^i$	est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;
Σ_i	indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

Your guide to understanding Canada's economy

The structure of Canada's economy can seem difficult to understand. What do we produce? How do we produce it? Who buys it, and who sells it? Statistics Canada's new publication, the GUIDE TO THE INCOME AND EXPENDITURE ACCOUNTS, addresses these puzzling issues and explains how the Income and Expenditure Accounts (IEA) will enrich your understanding of our economic system.

At the centre of macroeconomic analysis and policy-making in Canada, the IEA show how various groups like households, businesses and governments raise revenue and expend it to purchase goods and services. Together the IEA afford an opportunity to assess the performance of the national and provincial economies.

Developed for both economic specialists and general users, the *Guide* is the first in a series that will fully document Canada's system of national and provincial accounts. In four concise chapters, the *Guide* examines a comprehensive range of topics, including:

- Who uses the IEA and for what purposes
- The role of the IEA within Canada's System of National Accounts (SNA)
- The impact of the Historical Revision of 1986
- Why GDP, rather than GNP, is the central aggregate of the system
- The significance of the Sector Accounts to understanding how a modern economy functions
- The importance of Constant Price Estimates to both the IEA and the SNA
- How the GDP estimates are calculated
- How the quality and reliability of the IEA estimates are assessed

The *Guide* also presents dozens of tables to clearly illustrate theoretical examples and to help you fully understand technical aspects of the IEA.

For business strategists, students, economic analysts and current users of SNA data, the *Guide* is a must. Order the **Guide to the Income and Expenditure Accounts** (Cat.# 13-603E, No.1) for only $35 in Canada, US$42 in the United States and US$49 in other countries. **Call toll-free 1-800-267-6677 and use your Visa or MasterCard, fax your order to 1-613-951-1584, or write to:**
Publication Sales, Statistics Canada,
Ottawa, Ontario K1A 0T6

La structure de l'économie canadienne peut sembler difficile à comprendre. Que produisons-nous? Comment produisons-nous? Qui achète notre production et qui la vend? La nouvelle publication de Statistique Canada, GUIDE DES COMPTES DES REVENUS ET DÉPENSES, répond à ces questions difficiles et explique comment les comptes des revenus et dépenses (CRD) vous aideront à mieux comprendre notre système économique.

Les CRD se trouvent au coeur de l'analyse macroéconomique et des prises de décisions au Canada et montrent comment différents groupes, tels que les ménages, les entreprises et les administrations, se procurent leurs recettes et les dépensent en biens et en services. Ils permettent ainsi d'évaluer les résultats des économies nationale et provinciales.

Destiné aux spécialistes de l'économie comme au grand public, ce *Guide* est le premier ouvrage d'une série qui traite à fond du système de comptabilité nationale du Canada et des provinces. En quatre chapitres concis, le *Guide* aborde un éventail complet de sujets, dont :

- L'identification des personnes qui utilisent les CRD et dans quels buts
- Le rôle des CRD dans le système de comptabilité nationale du Canada (SCN)
- L'incidence de la révision historique de 1986
- Le remplacement du PNB par le PIB
- L'importance des comptes sectoriels pour comprendre le fonctionnement d'une économie moderne
- L'importance des estimations en prix constants pour les CRD et le SCN
- Le calcul des estimations du PIB
- L'évaluation de la qualité et de la fiabilité des estimations des CRD

Le *Guide* contient également des dizaines de tableaux afin d'illustrer clairement des exemples théoriques et de vous aider à comprendre parfaitement les aspects techniques des CRD.

Pour les stratégistes des entreprises, les étudiants, les analystes de l'économie et les utilisateurs actuels des données du SCN, le *Guide* est une lecture qui s'impose. Commandez le **Guide des comptes des revenus et dépenses** (N° 13-603F, N°1 au catalogue) pour 35 $ seulement au Canada, 42 $ US aux États-Unis et 49 $ US dans les autres pays. **Composez sans frais le 1-800-267-6677 et utilisez votre carte VISA ou MasterCard, télécopiez votre commande au 1-613-951-1584, ou écrivez à :**

MERCI DE VOTRE COMMANDE!

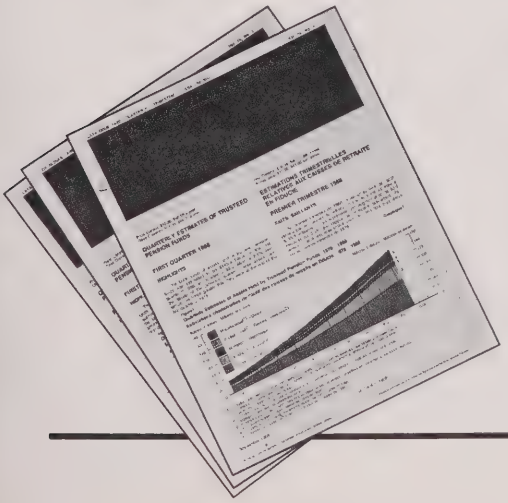
Statistique Canada Statistics Canada

Canada

Do you really have time to monitor over 200 Trusteed Pension Funds?

You do – if you subscribe to **Quarterly Estimates of Trusteed Pension Funds**.

The only periodical of its kind in Canada, Quarterly Estimates surveys the 200 largest trusteed pension funds, which hold 85% of the assets of all trusteed funds. The result is detailed, aggregate estimates of the income, expenditure and assets of approximately 3,800 funds operating in Canada.



Each issue gives you:
- current financial data for employee and employer contributions to the fund;
- investment income, profits and losses on sales of securities;
- pension payments and annuity purchases.

Distribution of investment portfolios among such vehicles as stocks, bonds, pooled funds and short term holdings is also highlighted. The accompanying analysis examines trends, growth and performance over time.

Get the numbers.

Subscribe to **Quarterly Estimates of Trusteed Pension Funds,** (Catalogue No. 74-001) for the regular update you need. A subscription to this quarterly is $44 annually in Canada, US$53 in the United States and US$62 in other countries.

To order, write Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Vous avez le temps de vous renseigner sur plus de 200 caisses de retraite en fiducie ?

Oui – si vous vous abonnez à **Estimations trimestrielles relatives aux caisses de retraite en fiducie.**

Ce périodique, unique en son genre au Canada, passe en revue la situation des 200 plus importantes caisses de retraite en fiducie, qui représentent 85 % de l'actif de l'ensemble des caisses de retraite. Le résultat prend la forme d'estimations détaillées et globales des recettes, des dépenses et de l'actif d'environ 3 800 caisses de retraite au Canada.

Chaque numéro vous présente :
- des données financières courantes relativement aux cotisations de l'employé et de l'employeur à la caisse de retraite;
- les revenus de placements ainsi que les profits et pertes sur les ventes de titres;
- les paiements des pensions et les achats de rentes.

Vous y trouverez également des renseignements sur la répartition des portefeuilles de placement entre les actions, les obligations, les fonds communs et les placements à court terme ainsi qu'une analyse des tendances, de la croissance et du rendement dans le temps.

Abonnez-vous !

La publication **Estimations trimestrielles relatives aux caisses de retraite en fiducie** (n° 74-001 au catalogue) vous permet d'obtenir régulièrement les données à jour dont vous avez besoin. L'abonnement à cette publication trimestrielle coûte 44 $ par année au Canada, 53 $ US aux États-Unis et 62 $ US dans les autres pays.

Pour commander, veuillez écrire à Vente des publications, Statistique Canada, Ottawa (Ontario), K1A 0T6 ou communiquer avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste figurant dans la présente publication).

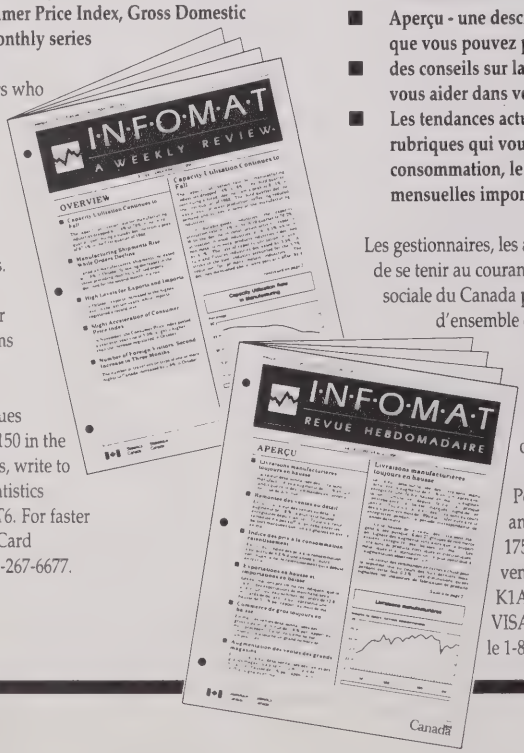
I·N·F·O·M·A·T

Don't start your week without it

Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.



In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview - an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for $125 in Canada, US$150 in the U.S. and US$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A OT6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

Chaque semaine, Infomat vous offre :

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement les tendances
- Aperçu - une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissements ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 $ au Canada, 150 $ US aux États-Unis et 175 $ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

St. John's	(1-800-565-7192)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)
Montréal	(283-5725)	Edmonton	(495-3027)
Ottawa	(951-8116)	Calgary	(292-6717)
Toronto	(973-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

r nombres rectifiés.

x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Industrial Product Price Index

Preliminary data indicate that the Industrial Product Price Index (IPPI, 1986 = 100) in August 1993 rose to 112.8, up 0.6% from July's 112.1 and up 0.4% from the previous high, March's 112.3.

Indexes for 16 of the 21 major groups of products increased, four remained unchanged, and only one declined, non-metallic mineral products (-0.2%). The most significant month-to-month price increases were for automobiles, trucks, and other transport equipment (+1.5%) and lumber, sawmill and other wood products (+3.4%).

During August, the value of the U.S. dollar rose 2.6% against the Canadian dollar, increasing the value of export prices quoted in American dollars. This particularly affected the indexes for automobiles, trucks, and other transport equipment, paper and paper products, and, to a lesser extent, lumber, sawmill, and other wood products. In August 1993, the American dollar was 10.2% higher against the Canadian dollar than in August 1992.

In August, the year-to-year change in the IPPI was 3.2% higher than that in June and July but still appreciably below January's year-to-year change of 4.4%. The price index for first-stage intermediate goods remained lower than a year earlier, but by less than in July. The year-to-year change in second-stage intermediate goods was higher than in July, as was the case for capital equipment and for all other finished goods. Foods and feeds continued to show a 1.8% year-to-year change.

The lumber, sawmill and other wood products price index recovered 3.4% in August, following a four-month period of declines. The increase was primarily due to a 6.1% rise in softwood lumber prices. East of the Rockies, price increases ranged from 7.2% in Ontario to 19.8% on the Prairies. In British Columbia, the interior saw a 7.7% increase but, on the coast, prices declined by 0.8% overall. The increase in prices occurred after North American inventories had been run down in the preceding period. Supply in western Canada was also affected by the B.C. Rail strike. The lumber, sawmill and other wood products price index was 16.0% higher in August 1993 than in August 1992.

The automobiles, trucks and other transportation equipment price index rose 1.5% in August due to the change in the valuation of the Canadian dollar on the price of exports. On a year-to-year basis, domestic automobile prices in August were up 1.9% compared to 12.4% for export prices; for trucks, domestic prices were up 4.2% while those for export were up 15.2%.

The meat, fish, and dairy products index rose 0.7% in August. This increase was primarily due to a 3.1% increase in the price index for fresh or frozen pork. Partially offsetting this increase was a 0.6% decline in beef and veal prices. The meat, fish, and dairy products index was 3.9% higher in August 1993 than in August 1992. Pork prices were 15.8% higher and beef and veal prices were up 3.5%.

Faits saillants

Indice des prix des produits industriels

Selon les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) a progressé en août 1993 pour atteindre un niveau de 112,8, soit une hausse de 0,6% par rapport au niveau de 112,1 enregistré en juillet et de 0,4% par rapport au sommet précédent observé en mars (112,3).

Les indices de 16 des 21 grands groupes de produits ont augmenté alors que quatre sont demeurés inchangés et que un, l'indice des produits minéraux non métalliques, a diminué (-0,2%). Les augmentations de prix d'un mois à l'autre les plus importantes ont été observées pour l'indice des voitures, camions et autre matériel de transport (+1,5%) et pour l'indice des sciages, produits de scierie et divers produits du bois (+3,4%).

En août, la valeur du dollar américain a progressé de 2,6% par rapport au dollar canadien, ce qui a fait augmenter la valeur du prix des exportations libellées en dollars américains. Cette appréciation a influencé plus particulièrement l'indice des voitures, camions et autre matériel de transport, celui du papier et produits connexes et, dans une moindre mesure, celui des sciages, produits de scierie et divers produits du bois. Entre août 1992 et août 1993, le cours du dollar américain par rapport au dollar canadien a augmenté de 10,2%.

En août, la variation d'une année à l'autre de l'IPPI s'est fixée à 3,2%, soit une variation supérieure aux variations observées en juin et juillet mais malgré tout sensiblement inférieure à celle de janvier (4,4%). L'indice des prix des produits semi-finis de première étape est demeuré à un niveau inférieur à celui atteint un an auparavant, mais ce niveau est quand même supérieur à celui de juillet. La variation d'une année à l'autre des produits finis de deuxième étape a été plus élevée qu'en juillet; il en a été de même pour le matériel capitalisé et les autres produits finis. L'indice des aliments de consommation et aliments pour animaux a encore enregistré une variation d'une année à l'autre égale à 1,8%.

L'indice des sciages, produits de scierie et divers produits du bois a progressé de 3,4% en août, après avoir diminué pendant quatre mois. Cette augmentation était en grande partie attribuable à la hausse de 6,1% du prix du bois de construction de résineux. À l'est des Rocheuses, les majorations de prix étaient comprises entre 7,2% en Ontario et 19,8% dans les Prairies. En Colombie-Britannique, on a observé à l'intérieur de la province une hausse de 7,7% alors que sur le littoral les prix ont dans l'ensemble régressé de 0,8%. La progression des prix a été enregistrée après que les stocks nords-américains ont été significativement réduit durant la période précédente. L'offre dans l'Ouest canadien a également été influencée par la grève des chemins de fer de la Colombie-Britannique. En août 1993, l'indice des sciages, produits de scierie et divers produits du bois a augmenté de 16,0% par rapport à août 1992.

L'indice des voitures, camions et autre matériel de transport s'est accru de 1,5% en août en raison de l'influence du changement de valeur du dollar canadien sur le prix des exportations. D'une année à l'autre, les prix intérieurs des automobiles ont progressé de 1,9% en août alors que les prix à l'exportation ont augmenté de 12,4%. Dans le cas des camions, les prix intérieurs se sont accrus de 4,2% et les prix à l'exportation, de 15,2%.

L'indice des viandes, poissons et produits laitiers a augmenté de 0,7% en août. Cette hausse est surtout attribuable à la hausse de 3,1% de l'indice des prix du porc frais et congelé. Cette hausse est partiellement neutralisée par un recul de 0,6% des prix du boeuf et du veau. L'indice des viandes, poissons et produits laitiers a été en août 1993 supérieur de 3,9% à celui enregistré en août 1992. Les prix du porc ont augmenté de 15,8% et ceux du boeuf et du veau, de 3,5%.

Highlights

Raw Materials Price Index

Based on preliminary data, the Raw Materials Price Index (RMPI, 1986 = 100) was 113.2 in August 1993, up 0.4% from the previous month. The increase in the overall index was largely attributable to increases of 2.5% in the mineral fuels index and 0.8% in the animals and animal products index. The decrease of 2.4% in the wood index had a significant offsetting effect on the increase in the RMPI. As in July, August noted five of the seven major components increasing.

The RMPI was up 5.3% from the August 1992 figure mainly because of increases in the indexes for wood (+36.2%), animals and animal products (+5.7) and vegetable products (+11.3). These increases were moderated by the decline in the mineral fuels index (-10.0%). The overall index excluding mineral fuels has risen 12.4% over the last twelve months.

The mineral fuels index increased 2.5% in August 1993, primarily as a result of the increase in its main component, crude mineral oils (+2.7%). Despite the increase in August, the mineral fuels index declined 10.0% from its August 1992 level, primarily owing to an 11.2% drop in the crude mineral oil index.

The animals and animal products index was up 0.8% in August 1993, primarily due to higher prices for hogs (+3.5%) and cattle (+1.4%). In July, hog prices and cattle prices showed decreases after rising through most of the first part of the year. The August increases for hogs and cattle were moderated by the decrease in the fish index (-2.6%). Over the year to August 1993, the animals and animal products index increased 5.7%. The major contributing factors were increases in the prices for hogs (+20.6%) and cattle (+11.4%). The fish index year-over-year has declined 7.5% which has slightly dampened the 12-month increase (+5.7%) for the animals and animal products index.

The vegetable products index increased 0.3% in August 1993, mainly because of higher prices for wheat (+5.3%) and soybeans (+6.0%). The decrease in canola prices (-6.3%) partially offset the overall increase for the vegetable products index. The canola index was at its lowest for the year, but still higher (+16.5%) than a year ago. Over the past year, the vegetable products index has increased by 11.3%. The principal contributors have been wheat (+23.4%), soybeans (+40.8%), and canola (+16.5%).

The decrease in the wood index in August (-2.4%) was the first decrease after its having increased steadily for a year and a half. This decrease was primarily due to the lower prices for softwood logs and bolts, (-3%). The wood index was still 36.2% higher than a year ago, due mainly to the price increase in the softwood logs and bolts (+48.4). The wood index remains the principal contributor to the upward movement from August 1992 to August 1993 in the RMPI.

Faits saillants

Indice des prix des matières brutes

Selon les données provisoires, l'indice des prix des matières brutes (IPMB, 1986 = 100) s'est fixé à 113,2 en août 1993, ce qui représente une augmentation de 0,4% par rapport à juillet. L'augmentation de l'indice d'ensemble s'explique dans une large mesure par la progression de 2,5% de l'indice des combustibles minéraux et celle de 0,8% de l'indice des animaux et des substances animales. La baisse de 2,4% de l'indice du bois a freiné de façon appréciable la croissance de l'IPMB. Comme en juillet, cinq des sept principaux indices sont à la hausse.

Par rapport à août 1992, l'IPMB a progressé de 5,3% en raison principalement de la croissance des indices du bois (+36,2%), des animaux et substances animales (+5,7%) et des substances végétales (+11,3%). Ces augmentations ont été atténuées par la baisse de 10,0% de l'indice des combustibles minéraux. L'indice d'ensemble sans les combustibles minéraux a augmenté de 12,4% au cours des douze derniers mois.

L'indice des combustibles minéraux a augmenté de 2,5% en août 1993, en raison surtout de la croissance de sa principale composante, les huiles minérales brutes (+2,7%). En dépit de cette augmentation, toutefois, l'indice des combustibles minéraux a baissé de 10,0% par rapport à son niveau d'août 1992, compte tenu d'une chute de 11,2% de l'indice des huiles minérales brutes.

L'indice des animaux et substances animales s'est accru de 0,8% en août 1993, principalement en raison de la majoration du prix des porcs (+3,5%) et des bovins (+1,4%). En juillet, le prix des porcs et des bovins s'était replié, après avoir augmenté pendant la plus grande partie du premier semestre. La croissance du prix des porcs et des bovins a été atténuée par le recul de l'indice du poisson (-2,6%). D'une année à l'autre, l'indice des animaux et substances animales s'est accru de 5,7%. La principale cause de la croissance a été le prix des porcs et des bovins, qui ont augmenté respectivement de 20,6% et de 11,4%. L'indice du poisson a baissé de 7,5% par rapport à août 1992, ce qui a atténué la croissance de l'indice des animaux et substances animales (+5,7%).

L'indice des substances végétales a augmenté de 0,3% en août 1993, principalement à cause de la majoration du prix du blé (+5,3%) et des graines de soja (+6,0%). La diminution de 6,3% du prix du canola a compensé en partie la progression générale de l'indice des substances végétales. En août, l'indice du canola était à son niveau le plus bas de l'année, mais il était toujours supérieur de 16,5% à son niveau de l'année précédente. Au cours de l'année écoulée, l'indice des substances végétales s'est accru de 11,3%. Les principales causes en sont le blé (+23,4%), les graines de soja (+40,8%) et le canola (+16,5%).

La baisse de 2,4% de l'indice du bois en août 1993 a été la première que l'on a observé après les hausses soutenues des dix-huit derniers mois. Cette baisse était attribuable principalement à la réduction de 3% du prix des billes et billots de résineux. L'indice du bois était encore supérieur de 36,2% à son niveau d'un an plus tôt à cause de l'accroissement de 48,4% du prix des billes et billots de résineux. L'indice du bois reste la principale cause du mouvement à la hausse de l'IPMB d'août 1992 à août 1993.

TEXT TABLE II. Raw Materials Price Index (1986 = 100)

TABLEAU EXPLICATIF II. Indice des prix des matières brutes (1986 = 100)

	Index Indice			Percentage change Variation proportionnelle		Contribution to percentage change(1) Contribution à la variation en pourcentage(1)		Relative importance of group 1986 Importance relative du groupe
	August 1993(2) Août 1993(2)	July 1993(2) Juillet 1993(2)	August 1992 Août 1992	August 1993 / July 1993 Août 1993 / Juillet 1993	August 1993 / 1992 Août 1993 / 1992	August 1993 / July 1993 Août 1993 / Juillet 1993	August 1993 / 1992 Août 1993 / 1992	
Raw Materials – Total – Ensemble des matières brutes	113.2	112.7	107.5	0.4	5.3	0.44	5.30	
Total excluding mineral fuels – Ensemble sauf combustibles minéraux	120.3	120.7	107.0	-0.3	12.4	-0.24	8.51	68.3
Vegetable Products – Substances végétales	98.2	97.9	88.2	0.3	11.3	0.03	0.97	10.3
Animals and Animal Products – Animaux et substances animales	110.0	109.1	104.1	0.8	5.7	0.20	1.41	25.5
Wood – Bois	190.9	195.5	140.2	-2.4	36.2	-0.53	6.21	13.1
Ferrous Materials – Matières ferreuses	103.9	102.9	93.6	1.0	11.0	0.03	0.35	3.6
Non-ferrous Metals – Métaux non ferreux	95.8	95.6	99.2	0.2	-3.4	0.02	-0.41	13.2
Non-Metallic Minerals – Minéraux non métalliques	99.7	99.9	99.9	-0.2	-0.2	0.00	0.00	2.6
Mineral fuels – Combustibles minéraux	97.8	95.4	108.7	2.5	-10.0	0.68	-3.19	31.7

(1) This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes.
(1) Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient inchangés.
(2) These indexes are preliminary.
(2) Ces indices sont provisoires.

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.
(2) Revised.
(2) Révisé.
(3) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(3) L'agregation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'Indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'Indice total – Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
ss indicates the S-level commodity code (from 9 to 28)
mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
nn indicates either a split of the M-level commodity,
or 91, which indicates a special aggregation
or 99, which indicates special details.
pppp indicates the PCG code (except for some special aggregations which include several PCGs).
rr indicates a split of a PCG.
The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:
ss indique le code du niveau S des produits (de 9 à 28)
mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)
nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.
pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)
rr indique une composante d'un GPP.
La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

(1) Monthly prices are collected and processed three times per annum.
(1) Des prix mensuels sont relevés et calculés trois fois par année.
(2) Indexes for the current year and previous year are subject to revision.
(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about five weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes,* is released about four weeks after the Daily Bulletin release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ cinq semaines après la fin du mois de référence dans le Quotidien (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie,* paraît quatre semaines environ après le communiqué dans le *Quotidien.* Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons

the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^{i}$$

$P_{t/o}^{(agg)}$	denotes the composite price index movement between the base period o and time t for the defined aggregate;
w^i	is the transaction value of the element i in the base period;
$P_{t/o}^{i}$	is the price index for element i, meaning its price change from the base period to time t;
Σ_i	indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$	dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;
w^i	est la valeur de transaction de l'élément i au cours de la période de référence;
$P_{t/o}^{i}$	est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;
Σ_i	signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, $40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, $25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 $.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 $.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately five weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occured for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ cinq semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

Σ_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w^i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

Σ_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986 = 100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981 = 100. The new, 1986 = 100 indexes can be linked with their equivalents in the 1981 = 100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613)951-9607 or 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986 = 100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981 = 100, précédemment publiés. Les nouvelles séries basées 1986 = 100 peuvent être raccordées à leurs séries équivalentes basées 1981 = 100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone (613)951-9607 ou 951-3350, télécopieur (613)951-2848.

CANADA'S ENVIRONMENT

L'ENVIRONNEMENT DU CANADA

Every day you read news items about recycling, water pollution, industrial emissions or the depletion of the ozone layer. Unfortunately, these reports are often fragmented, making it difficult to get a complete picture of Canada's physical environment.

Human Activity and the Environment is written to help you understand the links between our population, socio-economic activities and our environment. You'll see, for example, how the purple loosestrife and zebra mussels are spreading throughout inland waters and the effect they have.

Vous lisez tous les jours des articles traitant de recyclage, de la pollution de l'eau, des émissions de gaz industrielles ou de la diminution de la couche d'ozone. Malheureusement, ces rapports sont trop souvent fragmentés et il devient difficile de se faire une parfaite idée de l'environnement physique du Canada.

Activité humaine et l'environnement est écrit afin de vous aider à comprendre les liens entre notre population, nos activités socio-économiques et notre environnement. Vous verrez, par exemple, comment les salicaires et les dreissna sont réparties à travers les eaux intérieures et quels en sont leurs effets.

CASE STUDY: A statistical profile of an Ontario river basin is also included as a case study to demonstrate how socio-economic information can be linked with physical data at a local level.

ÉTUDE DE CAS : un profil statistique du bassin hydrographique de l'Ontario est également présenté, comme étude de cas, en vue de montrer comment l'information socio-économique peut être mise en rapport avec les données physiques à un endroit donné.

Organized in three, easy-to-read sections: Population, Socio-Economic Systems, and Environmental Conditions, this publication examines our activities from a number of perspectives:

- resource consumption
- waste generation
- monitoring the conditions of land, water, air and living organisms

This unique bestseller highlights such fascinating details as:

- purchases of potential pollutants by Canadian households
- the importance of natural resources to the Canadian economy
- energy consumption by industry

L'ouvrage est divisé en trois parties importantes : la population, les réseaux socio-économiques et l'état de l'environnement, qui examine nos activités sous différents angles:

- la consommation des ressources naturelles
- la production des déchets
- la surveillance de l'état des terres, de l'eau, de l'air et des organismes vivants

Ce best-seller unique met en relief des détails aussi fascinants que :

- les achats de polluants potentiels par les grandes maisons canadiennes
- l'importance des ressources naturelles pour l'économie canadienne
- la consommation d'énergie par industrie

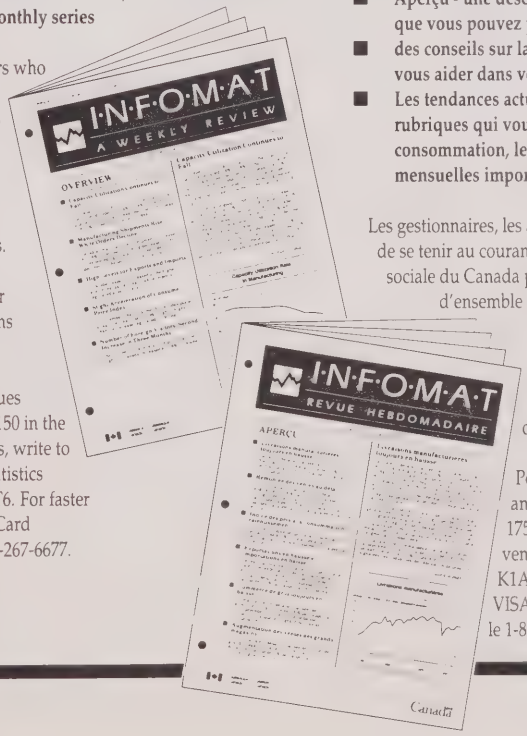
Don't start your week without it

Get a jump on your work week by making sure you have the most current economic and social information in Canada. Travelling by first class mail or courier, Statistics Canada's digest, Infomat, arrives at the beginning of each week to help you monitor key economic indicators and keep up with the most current data releases from Canada's national statistical agency.



In eight fact-filled pages, Infomat highlights the findings of Statistics Canada surveys and brings them to your desk each week, often long before detailed reports are published. Throughout the year you'll get the first results of over 100 ongoing surveys and many special surveys—from manufacturing shipments to the health of Canadians or post graduate employment to part-time workers.

Each week, Infomat presents you with,

- concise summaries of fresh facts from over 100 ongoing surveys
- charts and graphs that let you instantly scan the trends
- Overview - an outline of the subjects covered in each issue that you can scan in 30 seconds
- guidance on how to obtain special reports to assist you in your more detailed research.
- Current Trends and Latest Monthly Statistics sections that bring you up to date on the Consumer Price Index, Gross Domestic Product and 21 other key monthly series

Managers, analysts and researchers who are responsible for keeping up to date on changes in Canada's economic and social climate can count on Infomat — as a quick overview of the latest trends and as a weekly reminder of key indicators and data releases. Many subscribers use Infomat's highlights to add authority to their industry analyses, investment plans or corporate reports.

To order Infomat (11-002E), 50 issues annually for $125 in Canada, US$150 in the U.S. and US$175 in other countries, write to Publications Sales and Service, Statistics Canada, Ottawa, Canada, K1A OT6. For faster service, use your VISA or MasterCard and call toll-free in Canada, 1-800-267-6677.

votre première lecture de la semaine

Commencez votre semaine de travail en vous assurant que vous avez sous la main les dernières informations économiques et sociales au Canada. Voyageant en courrier de première classe ou par messagerie, Infomat, le condensé de Statistique Canada, arrive au début de chaque semaine pour vous aider à suivre les principaux indicateurs économiques et vous tenir au courant des dernières données publiées par l'organisme national d'enquêtes du pays.

En huit pages remplies de données, Infomat présente les faits saillants des enquêtes de Statistique Canada et les dépose sur votre bureau chaque semaine, bien avant que des rapports détaillés ne soient publiés. Tout au long de l'année, vous avez les premiers résultats de plus de 100 enquêtes permanentes et de nombreuses enquêtes spécialisées, qui vont des expéditions des fabricants à la santé des Canadiens ou de l'emploi des diplômés universitaires aux travailleurs à temps partiel.

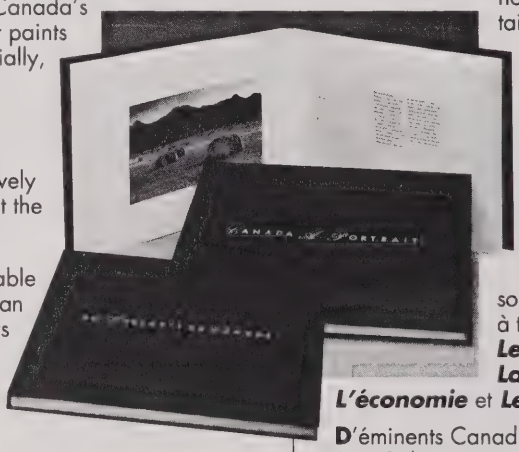
Chaque semaine, Infomat vous offre :

- des résumés de faits tout récents provenant de plus de 100 enquêtes différentes
- des diagrammes et des graphiques qui vous donnent immédiatement les tendances
- Aperçu - une description des sujets traités dans chaque numéro, que vous pouvez parcourir en 30 secondes
- des conseils sur la façon d'obtenir des rapports spéciaux pour vous aider dans vos recherches plus poussées
- Les tendances actuelles et Dernières statistiques mensuelles, rubriques qui vous tiennent à jour sur l'indice des prix à la consommation, le produit intérieur brut et 21 autres séries mensuelles importantes.

Les gestionnaires, les analystes et les chercheurs qui ont la responsabilité de se tenir au courant de l'évolution de la conjoncture économique et sociale du Canada peuvent compter sur Infomat pour avoir une vue d'ensemble des dernières tendances et disposer ainsi d'un aide-mémoire hebdomadaire des principaux indicateurs et données publiés. Plusieurs abonnés utilisent les faits saillants d'Infomat pour relever l'autorité de leurs analyses industrielles, projets d'investissements ou rapports financiers.

Pour commander Infomat (11-002F), 50 numéros par an pour 125 $ au Canada, 150 $ US aux Etats-Unis et 175 $ US dans les autres pays, écrivez à Publications, vente et service, Statistique Canada, Ottawa, Canada K1A 0T6. Pour un service plus rapide, utilisez votre carte VISA ou MasterCard et composez sans frais au Canada le 1-800-267-6677.

CANADA A PORTRAIT



A CELEBRATION OF OUR GREAT NATION

UN PORTRAIT DU CANADA

POUR CÉLÉBRER LA GRANDEUR DE NOTRE PAYS

Canada challenges the imagination. Imagine a country where Newfoundlanders live closer to Africans than they do to fellow Canadians in British Columbia. Or a country with an island that has a glacier bigger than Ireland. Imagine a country with two million lakes, and the world's longest coastline – but that shares a border with only one nation.

Statistics Canada has created the 54th edition of ***Canada: A Portrait*** as a celebration of our great nation. Drawn from Statistics Canada's rich palette of national data, it paints a picture of where we are socially, economically, culturally and politically.

Over 60 unique and beautiful photographs combined with lively text, provide a close-up look at the Canada of today.

Experience this land's remarkable natural regions and diverse human landscape through six chapters entitled: ***This Land, The People, The Society, Arts and Leisure, The Economy,*** and ***Canada in the World.***

Eminent Canadians such as astronaut Roberta Bondar, former hockey star Jean Béliveau, and writer W.O. Mitchell have contributed their personal visions of Canada.

Canada: A Portrait is a beautiful illustration of the Canada of today.

Presented in a 30 cm X 23 cm (12 1/4" X 9") format, prestige hardcover, with over 200 pages, ***Canada: A Portrait*** (Catalogue No. 11-403E) is available in Canada for $38.00 plus GST, US $41.95 in the United States, and US $48.95 in other countries.

To order write **Statistics Canada, Publications Sales, Ottawa, Ontario, K1A 0T6** or contact the nearest Statistics Canada Regional Reference Centre listed in this publication. For faster ordering call toll-free **1-800-267-6677** and use your VISA and MasterCard or fax your order to **(613) 951-1584.**

Le Canada est un pays qui défie l'imagination. Imaginez un pays où les Terre-Neuviens vivent plus près des Africains que de leurs compatriotes de la Colombie-Britannique. Un pays où se trouve une île sur laquelle s'étend un glacier plus grand que l'Irlande. Imaginez un pays qui compte 2 millions de lacs et le plus long littoral du monde, et pourtant un seul voisin.

Statistique Canada a créé la 54^{e} édition d'***Un portrait du Canada*** pour célébrer la grandeur de notre pays. C'est à partir du riche éventail de données nationales de Statistique Canada que l'on a brossé ce tableau de notre situation sociale, économique, culturelle et politique.

Plus de 60 magnifiques photos, mariées à un texte vivant, offrent une vision claire et détaillée de ce qu'est le Canada d'aujourd'hui.

Découvrez les splendides régions naturelles de ce pays, de même que son paysage humain des plus diversifiés, à travers six chapitres intitulés : ***Le territoire, La population, La société, Les arts et les loisirs, L'économie*** et ***Le Canada dans le monde.***

D'éminents Canadiens, tels Roberta Bondar, astronaute, Jean Béliveau, ancienne vedette de hockey, et W.O. Mitchell, écrivain, y font part de leur vision personnelle du Canada.

Un portrait du Canada... un magnifique ouvrage de collection qui décrit admirablement bien le Canada d'aujourd'hui.

Présenté dans un format de 30 cm sur 23 cm (12,25 po X 9 po), dans une couverture rigide de luxe et en plus de 200 pages, ***Un portrait du Canada*** (N^{o} 11-403F au catalogue) coûte 38 $ plus TPS au Canada, 41,95 $ US aux États-Unis et 48,95 $ US dans les autres pays.

Pour commander, écrivez à **Statistique Canada, Vente des publications, Ottawa (Ontario), K1A 0T6** ou communiquez avec le Centre régional de consultation de Statistique Canada le plus proche. La liste figure dans la publication. Pour commander plus rapidement, composez sans frais le **1-800-267-6677** et utilisez votre carte VISA ou MasterCard ou télécopiez votre commande au **(613) 951-1584**.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct on-line access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9607) or to the Statistics Canada reference centre in:

St. John's	(1-800-565-7192)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou tous les documents énumérés doivent être adressées à:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9607) ou au centre de consultation de Statistique Canada à:

St. John's	(1-800-565-7192)	Winnipeg	(983-4020)

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

® Marque déposée de Statistique Canada.

Révisions

Sauf avis contraire, les indices de prix contenus dans la présente publication sont susceptibles d'être révisés pour les six derniers mois indiqués. Toute révision portant sur une plus longue période est indiquée.

Le papier utilisé dans la présente publication répond aux exigences minimales de l'"American National Standard for Information Sciences" – "Permanence of Paper for Printed Library Materials", ANSI Z39.48 – 1984.

Highlights

Industrial Product Price Index

According to preliminary figures the Industrial Product Price Index (IPPI, 1986 = 100) in September 1993 rose to a new high, 112.9, up 0.1% from August's 112.8.

Indexes for 10 of the 21 major groups of products increased, four remained unchanged, and seven declined. Price changes were dominated by two product groups (lumber, sawmill and other wood products and primary metal products) but their effects virtually cancelled out each other. The lumber, sawmill and other wood products price index rose 2.0% while the primary metal products price index declined by -1.4%. Other price increases of less importance occurred in petroleum and coal products (+0.8%) and chemical and chemical products (+0.4%). Partly offsetting these increases were price declines in paper and paper products (-0.6%).

In September, the year-to-year change in the IPPI was 2.7%, the same as in July and was considerably below January's year-to-year change of 4.4%. Year-to-year price changes reflect the slowing of price changes in recent months. The price index for first stage intermediate goods was down 3.8% from September 1992, the largest year-to-year decline in this index since May 1992. The year-to-year change in the second stage intermediate goods index fell back to June and July's figure of 3.9%, from August's 4.3%. The year-to-year change in the prices of foods and feeds was back up to July's 1.9% from August's 1.8%. The year-to-year change figures, however, for both capital equipment and all other finished goods were down compared to August, at 4.6% and 3.5% compared to 5.3% and 3.9% respectively.

The lumber, sawmill and other wood products price index again moved upwards, rising 2.0%, for a second consecutive increase following a four-month period of declines. The increase was primarily due to a 2.8% rise in softwood lumber prices. East of the Rockies, price increases ranged from 4.3% in Quebec to 12.0% on the Prairies. In British Columbia, the interior saw a 2.9% increase but, on the coast, prices declined by 1.8% overall. The price index for B.C. western red cedar was down by 2.8% and that for B.C. hemlock and fir was down by 0.8%. The lumber, sawmill and other wood products price index was 16.8% higher in September 1993 than in September 1992.

The decline in the price index for primary metals was the result of price declines generally for non-ferrous metals. Iron and steel product prices, however, edged upward 0.4%. Nickel prices fell by 11.1%. There were also declines in the price indexes for aluminum products (-2.4%), copper and copper alloy products (-1.6%) and other non-ferrous metals (-2.8%). The price declines were the result of rising world stockpiles of these metals and the situation was worsened, in some cases, by continuing high exports of these metals by the countries of the Commonwealth of Independent States.

The decline in the paper and paper products price index was the result of declines in prices both for pulp (-1.5%) and for newsprint (-0.8%).

The increase in the chemical and chemical products index was primarily the result of a 2.2% increase in the organic industrial chemicals price index while the increase in the petroleum and coal products index was principally the result of the 1.2% increase in the gasoline and fuel oil price index.

Faits saillants

Indice des prix des produits industriels

Selon les chiffres provisoires, l'indice des prix des produits industriels (IPPI, 1986 = 100) en septembre 1993 a augmenté de 0,1% par rapport à août 1993 pour passer de 112,8 à 112,9, ce qui constitue un nouveau sommet.

Les indices de 10 des 21 principaux groupes de produits ont augmenté, quatre sont restés inchangés et sept ont diminué. Les variations de prix ont été dominées par deux groupes de produits, à savoir les sciages, produits de scierie et divers produits du bois de même que par les produits métalliques primaires, mais leurs effets se sont presque annulés. L'indice des prix des sciages, produits de scierie et divers produits du bois a augmenté de 2,0%, tandis que celui des produits métalliques primaires a diminué de 1,4%. On observe d'autres augmentations de prix de moindre importance comme dans le cas des dérivés du pétrole et du charbon (+0,8%) et des produits chimiques (+0,4%). Ces augmentations sont compensées en partie par une diminution de l'indice des prix du papier et des produits connexes (-0.6%).

En septembre, la variation d'une année à l'autre de l'IPPI s'établissait à 2,7%, soit autant qu'en juillet, et elle était considérablement inférieure à la variation annuelle de 4,4% observée en janvier. Les variations de prix d'une année à l'autre traduisent le ralentissement des variations de prix au cours des derniers mois. L'indice des prix des produits semi-finis de première étape était en baisse de 3,8% par rapport à septembre 1992, ce qui en a fait la baisse la plus forte depuis mai 1992. La variation d'une année à l'autre de l'indice des prix des produits semi-finis de deuxième étape est passée de 4,3% en août à 3,9%, ce qui correspond aux chiffres de juin et de juillet. La variation d'une année à l'autre du prix des aliments de consommation et des aliments pour animaux est retournée à son niveau de 1,9% de juillet, contre 1,8% en août. Par contre, les variations annuelles pour le matériel capitalisé et tous les autres produits finis sont en baisse par rapport à août et se fixent à 4,6% et à 3,5%, contre 5,3% et 3,9% respectivement.

L'indice des sciages, produits de scierie et divers produits du bois s'est redressé de nouveau et augmente de 2,0% pour le deuxième mois d'affilée, après quatre mois de diminution. Cette augmentation s'explique principalement par une hausse de 2,8% du prix des sciages de résineux. À l'est des Rocheuses, les hausses de prix étaient comprises entre 4,3% au Québec et 12,0% dans les Prairies. En Colombie-Britannique, la hausse des prix à l'intérieur a été de 2,9%, mais sur le littoral, les prix ont baissé dans l'ensemble de 1,8%. L'indice des prix du thuya géant de la C.-B. a baissé de 2,8%, et celui de la pruche et du sapin de la C.-B., de 0,8%. En septembre 1993, l'indice des sciages, produits de scierie et divers produits du bois a dépassé de 16,8% son niveau de septembre 1992.

La diminution de l'indice des prix des produits métalliques primaires s'explique par la baisse des prix des métaux non ferreux en général. Le prix des produits du fer et de l'acier, par contre, se redresse de 0,4%. Les prix du nickel ont diminué de 11,1%. On observe aussi une baisse des indices des prix des produits en aluminium (-2,4%), des produits du cuivre et en alliages de cuivre (-1,6%) et des autres métaux non ferreux (-2,8%). Ces diminutions des prix sont imputables à l'accumulation des stocks mondiaux de ces métaux et la situation s'est trouvée aggravée dans certains cas par les exportations toujours élevées de ces métaux en provenance des pays de la Communauté des États Indépendants.

La diminution de l'indice des prix du papier et des produits connexes s'explique par le recul du prix de la pâte de bois (-1,5%) et du papier journal (-0,8%).

La hausse de l'indice des prix des produits chimiques s'explique principalement par une augmentation de 2,2% de l'indice des prix des produits chimiques industriels organiques, tandis que la hausse de l'indice des produits du pétrole et du charbon a surtout été le résultat de la hausse de 1,2% de l'indice du prix de l'essence et du mazout.

Highlights

Raw Materials Price Index

Preliminary data for September 1993 indicate the Raw Materials Price Index (RMPI, 1986 = 100) reached 112.0, down 1.0% from the August revised level of 113.1. Major contributors to the decrease in the overall index were lower prices for mineral fuels (-2.0%), non-ferrous metals (-3.4%) and wood (-0.9%). Increases in prices for animals and animal products (+0.9%) partially offset the overall change. The RMPI excluding mineral fuels was down 0.5% from August.

The RMPI increased 2.3% from the September 1992 figure, primarily due to higher prices for wood (+31.6%), animals and animal products (+7.8%), vegetable products (+6.0%) and ferrous materials (+11.7%). The significant year-to-year decline in prices for mineral fuels (-14.6%) and the decline in prices for non-ferrous metals (-8.8%) contributed to reducing the year-to-year change. The RMPI excluding mineral fuels increased 10.5% over the last twelve months.

The RMPI after rising steadily from February to May has since been decreasing. The primary reasons are that prices for wood and crude oil were increasing from February to May. Wood prices continued to increase in June and July but at a slower rate, and fell in August and September. Crude oil prices decreased overall from June to September.

The mineral fuels index was down 2.0% in September as a result of lower prices for crude oil (-2.3%). On a year-to-year comparison the mineral fuels index was 14.6% lower than in September 1992, primarily due to crude oil prices down 16%. Since May, prices have generally been dropping for crude oil, with the September index at a level comparable to what it was in the early part of 1992.

The non-ferrous metals index fell 3.4% in September mostly because of decreases in the prices of gold (-6.5%), copper concentrates (-3.0%), alumina (-4.1%), and nickel concentrates (-8.9%). Compared to September 1992, the non-ferrous metals index was 8.8% lower. The main reasons were lower prices for concentrates of copper (-17.8%), zinc (-31.3%), and nickel (-34.6%). Gold prices (+8.2%) partially offset the downward year-to-year movement.

The wood index in September decreased 0.9%, reflecting lower prices for softwood logs and bolts (-1.3%). The year-to-year movement showed an increase of 31.6%, explained mostly by the increase in prices for softwood logs and bolts (+42.0%). The wood index after rising 28.7% between January and July has declined for the second consecutive month, but still remains by far the major upward contributor to the annual movement in the RMPI.

The animals and animal products index increased in September (+0.9%) due to higher prices for hogs (+3.6%) and cattle for slaughter (+1.0%). The year-to-year increase in the animals and animal products index (7.8%) reflects significantly higher prices for hogs (+27.0%) and cattle for slaughter (+12.9%). Hog and cattle prices have shown an upward trend in prices since 1992.

Faits saillants

Indice des prix des matières brutes

Selon les données provisoires, l'indice des prix des matières brutes (IPMB, 1986 = 100) se fixe à 112,0 en septembre 1993, ce qui représente une diminution de 1,0% par rapport au niveau révisé de 113,1 du mois précédent. La principale cause de la diminution de l'indice d'ensemble est la baisse du prix des combustibles minéraux (-2,0%), des métaux non ferreux (-3,4%) et du bois (-0,9%). La hausse du prix des animaux et des substances animales (+0,9%) compense en partie la variation générale. L'IPMB sans les combustibles minéraux est en baisse de 0,5% par rapport à août.

L'IPMB augmente de 2,3% par rapport à septembre 1992, principalement en raison de la majoration du prix du bois (+31,6%), des animaux et substances animales (+7,8%), des substances végétales (+6,0%), et des matières ferreuses (+11,7%). La diminution appréciable d'une année à l'autre du prix des combustibles minéraux (-14,6%) et des métaux non ferreux (-8,8%) explique en partie la réduction de la variation annuelle. L'IPMB sans les combustibles minéraux augmente de 10,5% au cours des douze derniers mois.

Après avoir augmenté de façon soutenue de février à mai, l'IPMB se replie par la suite. Ceci s'explique principalement par les prix du bois et du pétrole brut qui étaient en hausse entre février et mai. Les prix du bois ont continué à augmenter en juin et juillet, mais moins rapidement, et se sont repliés en août et septembre. Les prix du pétrole brut ont diminué entre juin et septembre.

L'indice des combustibles minéraux baisse de 2,0% en septembre en raison de la diminution du prix du pétrole brut (-2,3%). L'indice des combustibles minéraux est ainsi inférieur de 14,6% à son niveau de septembre 1992, en raison surtout d'une baisse de 16% du prix du pétrole brut. Depuis mai, le prix du pétrole brut a en général baissé, et l'indice de septembre se retrouve à un niveau comparable à celui auquel il se situait au cours de la première partie de 1992.

L'indice des métaux non ferreux diminue de 3,4% en septembre, en raison principalement d'une baisse du prix de l'or (-6,5%), des concentrés de cuivre (-3,0%), de l'alumine (-4,1%), et des concentrés de nickel (-8,9%). Par rapport à septembre 1992, l'indice des métaux non ferreux se replie de 8,8%. La principale raison est la diminution du prix des concentrés de cuivre (-17,8%), de zinc (-31,3%) et de nickel (-34,6%). Le relèvement du prix de l'or (+8,2%) compense en partie le mouvement à la baisse du prix des métaux non ferreux d'une année à l'autre.

L'indice du bois baisse de 0,9% en septembre, ce qui traduit la diminution du prix des billes et billots de résineux (-1,3%). D'une année à l'autre, l'indice du bois s'accroît de 31,6%, ce qui résulte principalement d'une majoration du prix des billes et billots de résineux (+42,0%). Après avoir augmenté de 28,7% entre janvier et juillet, l'indice du bois se replie pour le deuxième mois consécutif, mais demeure encore de loin la principale cause de la pression à la hausse dans l'évolution d'une année sur l'autre de l'IPMB.

L'indice des animaux et substances animales augmente de 0,9% en septembre en raison de la majoration du prix des porcs (+3.6%) et des bovins envoyés à l'abattage (+1,0%). L'augmentation de 7,8% d'une année sur l'autre de l'indice des animaux et substances animales rend compte d'une progression appréciable du prix du porc (+27,0%) et des bovins envoyés à l'abattage (+12,9%). Le prix des porcs et du bétail suit une tendance à la hausse depuis 1992.

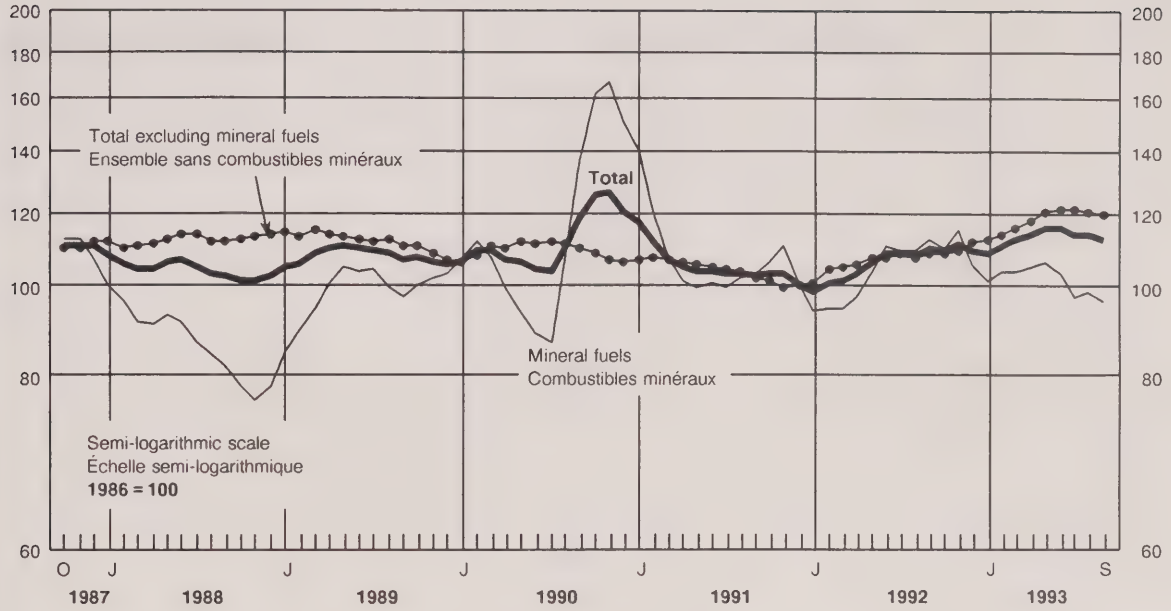
Non-ferrous Metals – Métaux non ferreux	92.3	95.5	101.2	-3.4	-8.8	-0.37	-1.08	13.2
Non-Metallic Minerals – Minéraux non métalliques	99.1	99.0	99.4	0.1	-0.3	0.00	-0.01	2.6
Mineral fuels – Combustibles minéraux	95.8	97.8	112.2	-2.0	-14.6	-0.60	-4.78	31.7

(1) This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes.
(1) Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient inchangés.
(2) These indexes are preliminary.
(2) Ces indices sont provisoires.



TEXT TABLE III. Raw Materials Price Index (1986 = 100)

TABLEAU EXPLICATIF III. Indice des prix des matières brutes (1986 = 100)

	Non ferrous metals - Métaux non ferreux	92.3	95.5	-3.4	-0.6	-8.8
	Non metallic minerals - Minéraux non métalliques	99.1	99.0	0.1	-0.5	-0.3
	Mineral fuels - Combustibles minéraux	95.8	97.8	-2.0	-6.7	-14.6

(1) These indexes are preliminary.
(1) Ces indices sont provisoires.
(2) Revised.
(2) Révisé.
(3) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
(3) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations
